

City of Kalamazoo Tent Guidelines

1. All tents set-up on City of Kalamazoo Property are required to be properly secured to protect them from overturning.
2. Tents 10'X10' and smaller are required to have a minimum of 40 lbs. of weight. The weights must be on a **minimum** of two corners. The wind direction should be considered when placing weights.
3. All weights will be secured to the frame/leg of the tent. **Bungee cords are not acceptable** as they stretch and can allow movement. **Duct tape and rope are acceptable.** Weights cannot hang freely from a tent as they can sway and could cause injury.
4. Any containers used as weight shall be securely covered with a lid to keep the weight material (water/sand) inside the container if overturned.

The artist is responsible for correcting any violations and will have one hour to correct said violations or the City and/or Arts Council will remove the artist. No refund will be issued and the artist will be responsible for any fines associated with the violation.

Acceptable weights for tents
